EDITOR-IN-CHIEF — D.P. PURPURA

ISSN 0 006-8993

SCOPE AND PURPOSE

BRAIN RESEARCH provides a medium for prompt publication of articles in the fields of neuroanatomy, neurochemistry, neurophysiology, neuroendocrinology, neuropharmacology, neurocommunications, behavioural sciences, molecular neurology and biocybernetics. Clinical studies that are of fundamental importance and have a direct bearing on the knowledge of the structure and function of the brain, the spinal cord, and the peripheral nerves will also be published.

TYPE OF PAPERS

1. **Full-length papers** reporting results of original fundamental research in any branch in the brain sciences. It is expected that these papers will be published about six months after receipt.
2. **Short Communications** reporting on research which has progressed to the stage when it is considered that the results should be made known quickly to other workers in the field. The maximum length allowed will be 1500 words or equivalent space in tables and illustrations. It is expected that short communications will be published about three months after receipt.
3. **Review articles.** A supplementary volume entitled Brain Research Reviews will be published quarterly which will be devoted to Review articles and occasionally long research papers with extensive review components, giving a survey, an evaluating and critical interpretation of recent research data and conceptions in a particular field of brain research or on a specific problem or topic of interest to workers in the brain sciences.
4. **Announcements.**

INSTRUCTIONS TO AUTHORS

Manuscripts should be submitted *in quadruplicate* and complete in all respects (including four copies of all illustrations), and deal with original research not previously published, or being considered for publication elsewhere,

Full length papers, short communications and review articles should be sent to:

Professor Dr. D. P. PURPURA
Rose F. Kennedy Center for Research in
Mental Retardation and Human Development
Albert Einstein College of Medicine
1410 Pelham Parkway South
Bronx, New York 10461—U.S.A.

Page charge For full-length papers longer than 16 printed pages a charge of $ 60.00 will be levied for each page in excess of 16. Upon receipt of each typescript of a full-length paper its size in printed pages is estimated by the Publisher. If the estimate is higher than 16 printed pages, the authors are advised that they may expect a page charge, the exact amount of which is fixed after the definite length of their paper is known.

As an approximate guide to authors for judging the length of their paper, the following estimations may be used:

2 type-written pages	= 1 printed page
2 'average' figures + legends	= 1 printed page
3 'average' tables	= 1 printed page
25 references	= 1 printed page

Manuscripts. Manuscripts should be written preferably in English and be accompanied by a list of 6–8 **key words** and a **summary** of about 200 words for **Research Reports** and 50–70 words for **Short Communications**, on a separate page. French and German articles are also acceptable if accompanied by an English summary. Manuscripts must be submitted in four copies in **double-spaced** typing with at least a 4 cm margin on pages of uniform size.

As a rule full length papers and review articles should be **divided into sections** headed by a caption (e.g. introduction, materials, methods, experimental, results, discussion, acknowledgements, etc.).

In order to ensure rapid publication, no revisions or up-datings will be incorporated into a Short Communication after the manuscript has been accepted and sent to the Publisher.

Authors' full names, academic or professional affiliations, and **complete addresses** should be included on a separate title page. The name and address of the author to whom proofs and correspondence are to be sent should be given.

Literature references. Citation of literature reference in the text should be given at the appropriate places by numbers as superscripts without parentheses. All references cited in the text should be listed at the end of the paper on a separate page (also double-spaced) arranged in alphabetical order of first author and numbered consecutively. All items in the list of references should be cited in the text and, conversely, all references cited in the text must be presented in the list.

Literature references must be complete, including initials of the authors cited, title of paper referred to, abbreviated title, volume, year, and first and last page numbers of the article in a periodical. The abbreviations of journal titles should conform to those adopted by World Medical Periodicals, 3rd edition 1961. (See example 2 below.)

(continued on inside back cover)

Subscription price: Dfl. 3680.00 (postage and handling costs included) or U.S. $ 1795.25. The guilder price is definitive.

The form of literature references to books should be: author, initials, title of book, publisher and city, year and page number referred to. (See example 1 below.)

References to authors contributing to multi-author books or to proceedings printed in book-form should be similar to those for books. (See example 3 below.)

Examples:

1 Adams, C. W. M., *Neurohistochemistry*, Elsevier, Amsterdam, 1965, 67 pp.
2 Chin, J., Killam, E. V. and Killam, K. F., Factors affecting sensory input in the cat: modification of evoked auditory potentials by reticular formation, *Electroenceph. clin. Neurophysiol.*, 18 (1965) 567–574.
3 Hernández Peón, R., Central neuro-humoral transmission in sleep and wakefulness. In K. Akert, C. Bally and J. P. Schadé (Eds.), *Sleep Mechanisms, Progress in Brain Research, Vol. 18*, Elsevier, Amsterdam, 1975, pp. 96–117.

This journal should be cited in list of references as *Brain Research.*

Illustrations. All illustrations must be submitted in quadruplicate and reach the editors in a form and condition suitable for reproduction. The illustrations should bear the author's name and be numbered in Arabic numbers according to the sequence of their appearance in the text, where they are to be referred to as Fig. 1, Fig. 2 etc.
Line-drawings should be in Indian ink on drawing or tracing paper. Lettering should be clear and of adequate size to be legible after reduction. Professional labelling is preferable but, if this is not possible, lettering should be in fine pencil.
Photographs, including roentgenograms, electroencephalograms, and electron micrographs should be supplied as clear black and white prints on glossy paper, usually larger than the final size of reproduction, but not more than 20 × 25 cm.
The degree of reduction will be determined by the publisher, but in general it should be assumed that the same degree of reduction will be applied to all figures in the same paper.
Reproduction in colours will have to be approved by the Editors. The extra costs of colour reproduction will be charged to the author(s).
Each illustration must have a legend. These should be typed with double spacing on a separate page and begin with the number of the illustration they refer to.

Tables. Table of numerical data should each be typed (also with double spacing) on a separate page, numbered in sequence in Roman numerals (Table I, II, etc.), provided with a heading, and referred to in the text as Table I, Table II, etc.

Proofs. Authors should keep a carbon copy of their manuscripts as proofs will be sent to them without manuscript. Proofs will usually be drawn on lower-quality paper. Only printer's errors may be corrected; no change in, or additions to, the edited manuscript will be allowed at this stage.

Reprints. A total of 50 reprints of each paper will be provided free of charge to the author(s). Additional copies can be ordered at prices shown on the reprint order form which will be sent to the author with the proofs.

COPYRIGHT

Submission to this journal of a paper entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17, paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.
Permission to reproduce, in whole or in part, any material published in this Journal must be sought from the publisher and from the author of the article in question.
Submission of a paper to **Brain Research** is understood to imply that it has not previously been published (except in abstract form) and that it is not being considered for publication elsewhere.
If illustrations or other small parts of articles or books already published elsewhere are used in papers submitted to **Brain Research,** the written permission of author and publisher concerned must be included with the manuscript. The original source must be indicated in the legend of the illustration in these cases.

SUBSCRIPTIONS

Issues (7½″ × 10½″) will appear weekly and be contained in 23 volumes per year. The subscription price is Dfl. 144.00 per volume (excl. postage) or U.S. $ 70.25 per volume (excl. postage).

Subscription orders should be addressed to: ELSEVIER/NORTH-HOLLAND BIOMEDICAL PRESS
P.O. Box 211
1000 AE Amsterdam — The Netherlands

Additional charges for air-mail delivery are available from the Publishers upon request.

ADVERTISEMENTS

Advertisement rates are available from the Publisher upon request. It should be noted that all advertisements are subject to approval by the Editors of the Journal.
